

BUSINESS DECISIONS MADE FOR ALL PROJECTS:

(by Om Satyawan Pathak)

1 Netflix Content Analysis EDA

Stakeholders: Content Strategy, Product Heads, Regional Managers

Key Decisions Stakeholders Can Take

- **Rebalance content mix**
 - Increase **TV shows and episodic content** to improve binge-watching and retention.
- **Expand regional content investment**
 - Allocate more budget to **India, South Korea, UK**, and other high-growth non-US markets.
- **Strengthen dominant genres**
 - Prioritize **Drama, International content, Documentaries, and Comedy**, as they consistently perform well.
- **Audience segmentation strategy**
 - Maintain strong **adult content (TV-MA)** pipeline but **increase family & kids content** to widen audience base.
- **Creator partnership strategy**
 - Continue or expand exclusive deals with **high-contributing directors** to ensure consistent content supply.
- **Content calendar optimization**
 - Plan major releases around **historically high-production months (2015–2020 trend, December spikes)**.

Business Value: Better subscriber growth, improved engagement, and stronger global reach.

2 Atliq Employees Performance Analysis (HR Analytics)

Stakeholders: HR Managers, Operations Heads, Leadership

Key Decisions Stakeholders Can Take

- **Hybrid work policy redesign**

- Formalize **WFH or hybrid models**, as employee preference for remote work is rising.
- **Attendance improvement strategy**
 - Address **declining presence %** through engagement initiatives rather than enforcement.
- **Health & wellness programs**
 - Increase focus on **employee wellness**, as sick leave is rising over time.
- **Team-level workload balancing**
 - Use day-wise and employee-wise trends to **redistribute workload** and prevent burnout.
- **Capacity planning**
 - Schedule critical work during **months with higher attendance (June)**.
- **Policy benchmarking**
 - Reassess leave, WFH, and flexibility policies to stay competitive in the job market.

Business Value: Higher productivity, lower burnout, improved employee retention.

3 Madhav E-Commerce Sales EDA

Stakeholders: Sales Heads, Marketing Team, Operations & Inventory Managers

Key Decisions Stakeholders Can Take

- **Inventory prioritization**
 - Stock more **Clothing and Bottomwear**, as they dominate quantity sold.
- **Payment optimization**
 - Continue offering **Cash on Delivery**, but incentivize **UPI/digital payments** to reduce operational costs.
- **Geographic sales focus**
 - Increase marketing and logistics investment in **Maharashtra, Madhya Pradesh, UP, and Delhi**.
- **Customer loyalty strategy**
 - Target **top-spending customers** with loyalty rewards or exclusive offers.
- **Seasonal campaign planning**
 - Align promotions with **high-profit months** identified in monthly trends.
- **Product portfolio refinement**
 - Expand **high-profit sub-categories** and discontinue consistently low-performing ones.

Business Value: Higher revenue, improved margins, efficient inventory management.

4 Telco Customer Churn Analysis EDA

Stakeholders: Customer Experience, Sales, Retention Teams, Executives

Key Decisions Stakeholders Can Take

- **Early churn prevention**

- Focus retention efforts on customers in their **first 1–2 months**, where churn is highest.
- **Contract strategy revision**
 - Encourage **long-term contracts** (1-year / 2-year) with discounts or bundled offers.
- **Senior citizen support programs**
 - Introduce tailored plans and assistance for **senior customers**, who churn more.
- **Service simplification**
 - Simplify **fiber-optic and add-on service packages**, which show higher churn.
- **Customer segmentation**
 - Create targeted offers based on **tenure, contract type, and service usage**.
- **Retention over acquisition**
 - Invest more in **customer retention campaigns**, as reducing churn directly increases profitability.

Business Value: Lower churn rate, higher lifetime value, stable recurring revenue.

5 Zomato Restaurants & Customer Analysis EDA

Stakeholders: Business Managers, Marketing Team, Restaurant Partners, Strategy Team

Key Decisions Stakeholders Can Take

- **Focus on high-demand cities**
 - Invest more in marketing and partnerships in **cities with the highest restaurant density and orders**.
- **Promote popular cuisines**
 - Highlight and promote **most-ordered cuisines** (e.g., North Indian, South Indian) to boost customer engagement.
- **Pricing strategy optimization**
 - Encourage restaurants to keep prices within the **most popular cost-for-two range**, as customers prefer affordable options.
- **Improve restaurant ratings**
 - Work with low-rated restaurants to improve **food quality, service, and delivery speed**, since ratings strongly influence orders.
- **Online delivery expansion**
 - Increase focus on **online delivery-enabled restaurants**, as they receive more customer orders.
- **Restaurant onboarding strategy**
 - Partner more with restaurants that match **customer demand patterns** (right cuisine + right price + online delivery).
- **Customer experience improvement**
 - Improve app recommendations using **ratings, cost, and cuisine preferences** to help users decide faster.

Business Value:

Higher order volume, better customer satisfaction, stronger restaurant partnerships, and increased platform revenue.
